Akshat Shrivastava

Gen AI /Data Scientist

Senior AI / Generative AI Engineer with 4+ years of experience in **Python, Machine Learning, NLP** and enterprise-scale AI systems. Delivered scalable solutions driving a 20% reduction in data processing time and 15% improvement in model performance. Specialized in **Agentic AI, LLM orchestration**, and production-grade **RAG systems**, with hands-on expertise in **Google ADK, LangGraph, Dialogflow CX, Vertex AI, OpenAI, Llama** and **Mistral** Experienced in building multi-agent workflows, Voice Bots, conversational commerce platforms and knowledge retrieval engines across GCP, Azure and AWS. Strong foundation in **RAG, Prompt Engineering, Vector Databases (Qdrant, ChromaDB), fine-tuning (LoRA, PEFT), model quantization, Docker deployment and evaluation frameworks (ROUGE, BLEU, LLM-as-Judge, precision/recall)** to ensure production readiness and measurable business impact.

WORK EXPERIENCE

GenAI Engineer
AutoZone Service LLP.

01/2025 - Present — *Gurugram, India*

Achievements/ Tasks

- Architected enterprise-scale **Agentic AI systems** using **Google ADK, LangGraph and Vertex AI**, orchestrating ~10 concurrent workflows for automated Helpdesk ticket classification and Tier-1 triage.
- Designed and deployed **Voice Bot & intelligent call routing** using **Dialogflow CX** and Google Customer Engagement Suite, reducing handling time and improving routing precision.
- Built end-to-end WhatsApp Conversational Commerce platform (US & Mexico) leveraging **Google ADK, LangGraph orchestration** and **Infobip (CPaaS)** for contextual multi-turn ordering workflows.
- Developed production-grade **RAG engine** using **Vertex AI, Cloud Run, Apigee and vector store architecture**, improving internal knowledge retrieval accuracy and response quality.
- Built classification pipeline processing ~500K commercial feedback records annually, achieving **93% accuracy**, automating 36% uncategorized data, saving ~100 manual hours/year
- Integrated multimodal image-based part identification and implemented structured evaluation framework using **ROUGE, BLEU, Tool Trajectory and LLM-as-Judge validation** to benchmark agent performance.
- Currently developing **Generative AI Legal Assistant** leveraging RAG architecture for contract clause extraction and compliance workflows with precision/recall-based evaluation.

Developer Data Scientist
Amlgo Labs Pvt Ltd.

04/2024 – 01/2025 — *Gurugram, India*

IT Services & Consulting firm

Achievements/ Tasks

- **Built a Conversational Database AI Bot** integrating **AWS S3**, **AWS RDS**, **Vanna AI**, **Qdrant** and **Ayshcn Architecture.** optimizing query performance and scalability. Leveraged **Azure Open AI** or **Ollama** and **Lang Chain** to translate natural language queries into SQL, reducing query resolution time by 35%.
- **Implemented a Retrieval-Augmented Generation (RAG)** system that efficiently processes and **embeds documents (Fast Embedding)**, reducing processing time by 40% and boosting retrieval accuracy by 25%.
- **Designed a Generative AI tool for CRM email queries,** enhancing response times by 27% and improving customer satisfaction. Utilized fine-tuning approaches such as **LoRA**, **Prompt Tuning**, and **PEFT** to optimize model performance and accuracy.

Developer Data Scientist | AI Engineer
Kanini Software solution pvt ltd.

09/2022 - 04/2024 — *Gurugram, India*

IT Services & Consulting firm

Achievements/ Tasks

- Developed and deployed production level **Azure Function API** for **project management** and **functional documentation automation**, achieving 70-80% accuracy using **LLMs** and **Hugging Face NLP** metrics in data preprocessing.
- Proficient in creating **Azure function apps**, **Cosmos database**, **VMs**, and deploying applications with **Docker**, **GIT Repository**, and **API management** for streamlined development and **Model deployment**
- Streamlined healthcare workflow by integrating summarization solution with **Electronic Health Record (EHR)** systems, eliminating manual data entry and reducing administrative tasks by **40%.**

TECHNICAL SKILLS

Cloud Platform:
Azure, GCP, Terraform

Database/Server:
My SQL, Qdrant, Chroma DB, PostgreSQL, No SQL, AlloyDB

Programming Language & Modules:
Python, NumPy, Pandas, Matplotlib, Seaborn, Scikit - Learn, Statsmodel, SciPy, Tensor-flow, SQL

Machine Learning:
Linear/Logistic Regression, SVM, Decision Trees, Random Forest, KNN, K-means Clustering, Boosting Algorithms, Clustering Algorithms, NLP.

Large Language Models:
Open AI, Azure Open AI, Llama, Vision model, Mistral, Gemini, Vanna AI, RAG

Agentic & GenAI Systems:
Google ADK, LangGraph, RAG Architecture, LLM Orchestration, Prompt Engineering, Agent Suite.

Agent Evaluation:
ROGUE, BLEU, Tool Trajectory, LLM-as-Judge, Precision/Recall.

API Frameworks:
Django, Streamlit UI, Fast API.

CERTIFICATES

Hacker Rank (Intermediate SQL) (04/2022)
https://www.hackerrank.com/certificates/22e88a238489

Hacker Rank (Basic Python) (06/2022)
https://www.hackerrank.com/certificates/2d96433fa2fb

Introduction to machine learning on AWS (05/2023)
https://coursera.org/verify/CMYXUJRENNFE

Google - Introduction to Generative AI (06/2023)
4065312

Microsoft Certified: Azure Fundamentals (07/2023)
1411BE97312A5F9D

Databricks - Generative AI Fundamentals (01/2024)
https://credentials.databricks.com/7af42bef-ea5c-4cff-ad8b-470bc2c14b0a

Google - Encoder-Decoder Architecture (08/2024)

EDUCATION

Post Graduate Program Data Science
Great Lakes Institute of Management

01/2022 - 06/2022

Courses

- Data Science & Machine learning Engineering.

Bachelor of Commerce (Honors)
Madhav Mahavidhyalaya, Jiwaji University

03/2019 - 03/2021
